

A guide to the XVIE Tree Bylaw

1. Read the Bylaw and the Rules and Regulations. It is a must to read both due to they complement each other.
2. Complete the Tree Bylaw Check Off Sheet. If the tree bylaw compliance is needed and the check off sheet is not completed in full, the building permit will not be issued until it is submitted.
3. Submit all supporting documents in compliance with the bylaw and rules and regulations at building permit submittal. For demolition permits and where a new building is being installed, the documents submitted at the demo are sufficient for compliance with the new building if there are no changes.
