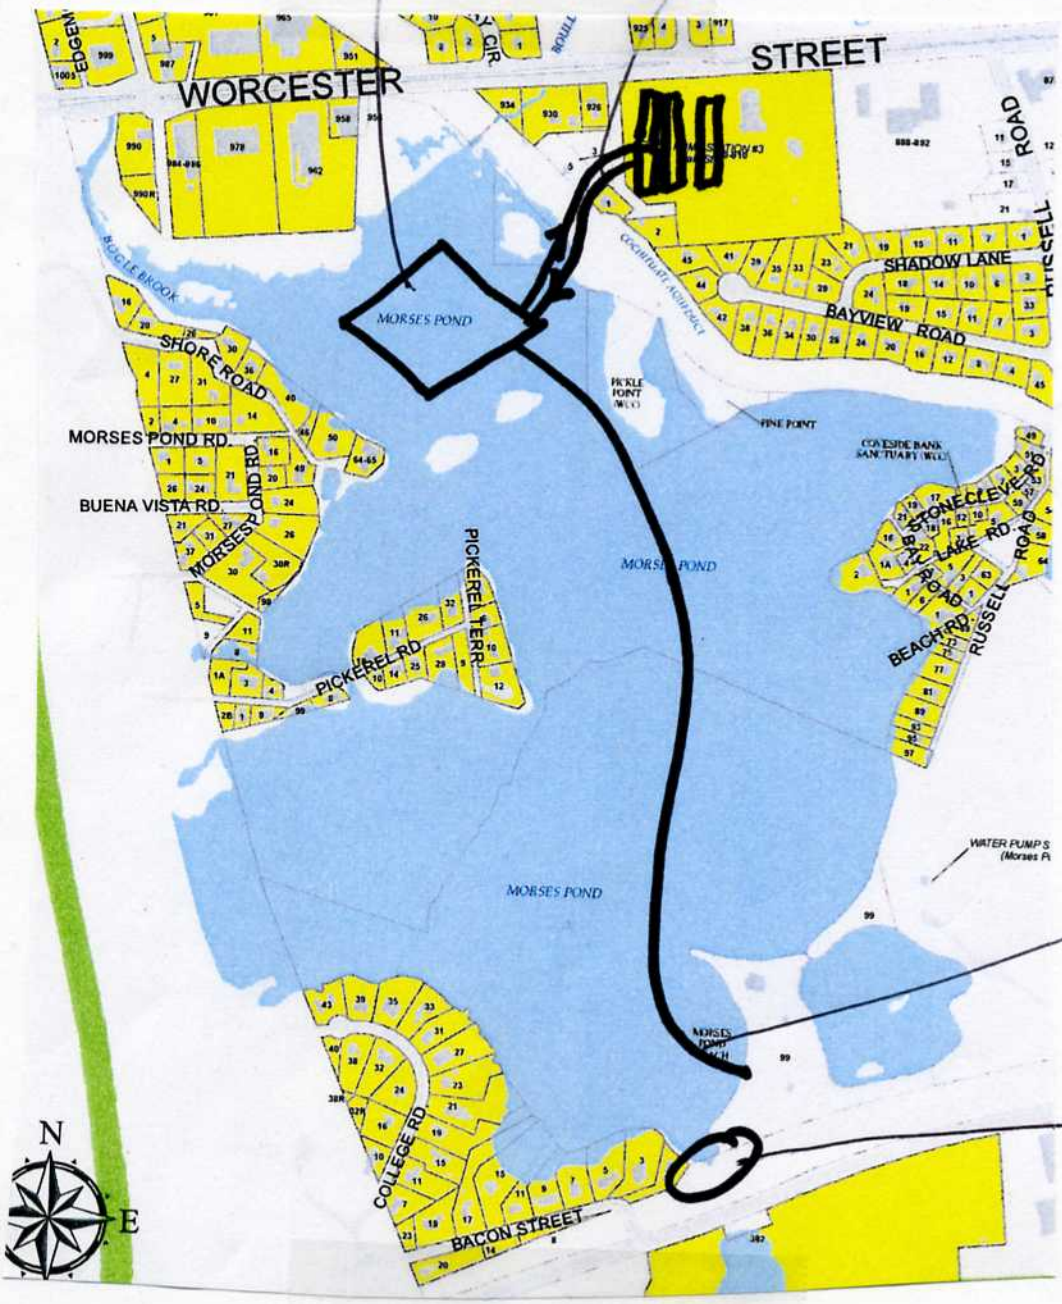
Morses Pond Northern Basin Dredging Project

(DRAFT Site Plan - to be Typed)

Pond Area to be Dredged

Drainage Pipes will pump water and sediment to St. James Parking Lot where it will settle in large "geotubes". Clean water will be returned to the pond via drainage pipe and sediment will be hauled off site in April 201



Clean sand will be pumped to Town Beach to replenish beach area.

Access area for launching of hydraulic dredging platform and operator's boat launch area.
