

# ATTENTION WATER USERS

## HYDRANT FLUSHING April 27 - May 1, 2015

The Water & Sewer Division of the Department of Public Works will be flushing water mains throughout the Town Monday, April 27 through Friday, May 1. Hydrant flushing is performed between the hours of 8 a.m. and 5 p.m. The purpose of flushing is to remove sediment buildup in the mains and to verify the safe operation of hydrants and valves. The flushing may result in reduced water pressure and temporary discoloration of the water caused by small particles dislodged from water mains during the flushing.

Any discoloration of the water will be temporary and is not harmful. However, the discolored water might stain your laundry – especially white fabrics – and may also stain plumbing fixtures. Therefore, we recommend that you avoid doing laundry during the noted flushing period and certainly while such conditions exist.

Prior to washing clothes, please check the *cold* water for possible discoloration. If the water is discolored, let the *cold* water run for a minute or two to begin clearing. If it does not clear at that time, try again later. Unfortunately, the Town cannot fully guarantee the safety of doing laundry and there is a possibility of discoloration even during the evenings and other times of the day because the water system has been disturbed. Please check your water carefully prior to doing laundry and inspect the laundry before it is dried.

The Water & Sewer Division appreciates your patience as we work to improve the quality of the drinking water. If you would like additional information, please call the Water Division at 235-7600, ext. 3355.
