You must pay all the costs up to the deductible amount before this plan begins to pay for covered services you use. See the chart starting on page 3 for how much you pay for covered services after you meet the deductible .

Is there an out-of-pocket limit on my expenses?	Yes. In-Network: \$2,000 per member per calendar year / \$4,000 per family per calendar year Out-of-Network: \$1,600 per Member per calendar year/\$3,200 per family per calendar year	The out-of-pocket limit is the most you could pay during a coverage period (usually one year) for your share of the cost of covered services. This limit helps you plan for health care expenses.
What is not included in the out-of-pocket limit?	Please see your Schedule of Benefits for out-of-pocket maximum exclusions for your plan.	Even though you pay these expenses, they don't count toward the out-of-pocket limit .

Summary of Benefits and Coverage: What this Plan Covers & What it Costs

	<ul style="list-style-type: none"> • Co-payments are fixed dollar amounts (for example, \$15) you pay for covered health care, usually when you receive the service. • Co-insurance is your share of the costs of a covered service, calculated as a percent of the allowed amount for the service. For example, if the plan's allowed amount for an overnight hospital stay is \$1,000, your co-insurance payment of 20% would be \$200. This may change if you haven't met your deductible. • The amount the plan pays for covered services is based on the allowed amount. If an out-of-network provider charges more than the allowed amount, you may have to pay the difference. For example, if an out-of-network hospital charges \$1,500 for an overnight stay and the allowed amount is \$1,000, you may have to pay the \$500 difference. (This is called balance billing.) • This plan may encourage you to use participating providers by charging you lower deductibles, co-payments and co-insurance amounts.

Questions and answers about the Coverage Examples:

What are some of the assumptions behind the Coverage Examples?

- Costs don't include **premiums**.
- Sample care costs are based on national averages supplied by the U.S. Department of Health and Human Services, and aren't specific to a particular geographic area or health **plan**.
- The patient's condition was not an excluded or preexisting condition.
- All services and treatments started and ended in the same coverage period.
- There are no other medical expenses for any **member** covered under this **plan**.
- **Out-of-pocket** expenses are based only on treating the condition in the example.
- The patient received all care from in-network **providers**. If the patient had received care from out-of-network **providers**, costs would have been higher.

What does a Coverage Example show?

For each treatment situation, the Coverage Example helps you see how **deductibles**, **co-payments**, and **co-insurance** can add up. It also helps you see what expenses might be left up to you to pay because the service or treatment isn't covered or payment is limited.

Does the Coverage Example predict my own care needs?

X No. Treatments shown are just examples. The care you would receive for this condition could be different based on your doctor's advice, your age, how serious your condition is, and many other factors.

Does the Coverage Example predict my future expenses?

X No. Coverage Examples are **not** cost estimators. You can't use the examples to estimate costs for an actual condition. They are for comparative purposes only. Your own costs will be different depending on the care you receive, the prices your **providers** charge, and the reimbursement your health **plan** allows.

Can I use Coverage Examples to compare plans?

✓ Yes. When you look at the Summary of Benefits and Coverage for other **plans**, you'll find the same Coverage Examples. When you compare **plans**, check the "Patient Pays" box in each example. The smaller that number, the more coverage the **plan** provides.

Are there other costs I should consider when comparing plans?

✓ Yes. An important cost is the **premium** you pay. Generally, the lower your **premium**, the more you'll pay in **out-of-pocket** costs, such as **co-payments**, **deductibles**, and **co-insurance**. You should also consider contributions to accounts such as health savings accounts (HSAs), flexible spending arrangements (FSAs) or health reimbursement accounts (HRAs) that help you pay **out-of-pocket** expenses.
