

Wellesley Natural Resources Commission's Green Wellesley Campaign

Invites You to Attend a FREE film screening

Six Degrees Could Change the World

Tuesday, April 29, 2014, 1:00 PM - 3:00 PM
at the Wellesley Free Library

Learn About How Just a Few Degrees Difference in Climate Can Vastly Affect Our Planet and What You Can Do About It!

By the year 2100, many scientists believe that the Earth's average temperature could rise by as much as six degrees Celsius. In this compelling documentary, National Geographic explores what each degree could mean for the future of our planet. The film will be followed by a brief discussion led by NRC Environmental Education Coordinator, Laura Kiesel, about what you can do to combat climate change.

The environmental film series event is part of the NRC Green Wellesley Campaign's effort to inform Wellesley's citizens about sustainable living, climate change and toxins, as well as motivate them to make small but significant changes in their daily lives to make our community and the world a better place!

This event is **FREE** and will take place in the Wakelin Room of the Wellesley Library at 530 Washington Street!
