

## Commercial Sheet Metal Permit (Other than one and two family dwelling)

The following is what is required to file for a commercial sheet metal permit:

- Sheet Metal Permit Application (available in the Building Department)
- If sheet metal work is taking place on an existing building, an investigation and evaluation done in accordance with 780 CMR Chapter 34 must be submitted with your permit application.
- Debris Disposal Form.
- Workman's Compensation Affidavit (binders are not acceptable)
- Plans bearing the stamp of a Registered Design Professional must be submitted no matter what size the project is, if the building is over 35,000 cubic feet of enclosed space.
- Construction Control Affidavit is required for all commercial sheet metal permits subject to construction control
