115 AA Stretch Code Energy Code Compliance Changes

1. Showing compliance at permit submittal;

Prescriptive (Additions, alternations, renovations or repairs only)

- Please complete in full and legible the 115 AA Stretch Code Compliance Sheet and submit supporting documentation.

Performance (New Residential Construction, additions, alternations, renovations or repairs)

- Please submit the projected HERS Rating Score with calculations performed by the Resnet accredited HERS RATER.

2. Compliance in the field;

Prescriptive with the Visual Inspection Option (Additions, alternations, renovations or repairs only)

- Schedule the new required inspection points for 2009 IECC compliance, see required inspections,

NOTE:

- If any inspections for an air barrier or the thermal envelope are not scheduled by the permit applicant and the inspector cannot verify the visual inspection, a door blower test may be required for air leakage compliance.
- The inspection check list shall be present for air barrier and thermal envelope inspections or the inspection cannot be conducted by the inspector, no exceptions.
- The code in effect is the 2009 International Energy Conservation Code (IECC) with the 115 AA Stretch Code Amendment.

Performance (New Residential Construction, additions, alternations, renovations or repairs)

- Please provide the final HERS Rating Certificate Score performed by the Resnet accredited HERS RATER.
