

TOY DECLARATION

We declare that **Terra XPS** as delivered from our facilities as a raw material, enables our customers to produce final products that comply with the following recommendations and regulations:

EEC/EFTA

The Safety of Toys, migration of certain elements. The European Standard EN 71 part 3. Edition 1994.

CEN - Member countries (European committee for Standardisation)

EN 71 - 3: The European Standard on the Safety of Toys (EN 71) part 3 (migration of certain elements).
Edition 2000.

In the production of Terra XPS DSM does not intentionally use Arsenic, Cadmium, Mercury, Antimony, Chromium, Lead, Barium or Selenium.

It is our experience that test plates made by DSM from Terra XPS or similar products meet the migration limits of these elements, given in the European Directive 88/378/EEC and in EN 71-3. The recommendations or regulations mentioned above refer to the final materials.

This declaration has been prepared and issued on the basis of currently applicable laws and regulations and our best knowledge and expertise currently available; the addressee or recipient is advised to regularly request updates hereof. This declaration replaces all previous ones relating to this subject.

The General Conditions of Sale of the entity selling this product apply to and are part of all our quotations, offers, agreements, sales, deliveries and all other similar dealings, unless explicitly agreed otherwise by means of a duly and mutually executed document.

This information holds for the material as it leaves its production facilities and does not include any additive, pigment, etc. subsequently added by the converter.

On behalf of the manufacturer,

Ir. G.P.J.M. Tiemersma-Thoone
Product Safety Expert.
