   Tree trimming around town.
   Documents:
   USINGTRAILSONLINEMAP.PDF

4. Closing Remarks
   People talk at the end of the meeting.
Using the Wellesley Trails Online Map

The Wellesley GIS Department and Trails Committee have created a website to help you navigate all of Wellesley’s trails. To use the site, just follow the instructions below:

1. Open the web browser on your phone and navigate to https://www.mapsonline.net/wellesleyma/trails.html

2. In the top left corner of the screen you will see your map tools: Layers and Find.

   a. Tap these buttons once to open the menu and tap them again to close the menu.

   b. On the Layers tab you can turn on and off certain map layers such as Points of Interest or Open Space

   c. On the Find tab, you can search for an address or parcel and quickly zoom to it.

3. At the bottom of the screen you will see your 3 navigation tools: Find, Zoom, and Follow.

   a. Tapping the Find tool will pan the map to center your current location on the screen. You will also see a blue dot that represents your location.

   b. Tapping the Zoom tool will zoom the map in to your location.

   c. Tapping the Follow tool will make the map track your location as you walk along the trails.
