RE: Stearns Road and Worcester Street

Lenore,

In follow-up to our brief discussion, I am concerned with rodent activity in the area of the 680 Worcester Street and 16 Stearns Road proposed developments. Over the past couple years, we have had increased calls and sighting of rats in various areas of town. One of those areas is the Francis road through Linden Street area of town.

It would be prudent that the developer, as part of this project contract with a licensed pest control company to conduct an initial assessment of the area and provide a written document of their findings and a proposal of active monitoring and abating if necessary any activity generated or disturbed through the process of development. I would request that this document be provided to the Health Department for review and approval. We will also continue to monitor this area and conduct our own assessments.

I can be reached at the Health Department at 1-781-235-0135 if you have any questions.

Sincerely,

A handwritten signature in blue ink, appearing to read "Leonard A. Izzo".

Leonard A. Izzo, R.S., C.H.O.  
Director of Public Health
