

***Cladrastis kentukea* – Yellowwood**

Foliage: Soft medium green in summer, beautiful yellow in fall

Habit: Low branching tree with a broad rounded crown

Bark: Very smooth, gray and beech-like

Flowers: 8 to 14" long pendulous panicle in May to early June

Fruit: Green pod turning brown in fall

No insect and disease issues

Size: 30-50'

Culture: Full sun to part shade

Landscape Value: Excellent tree for flowers and foliage, medium size and spreading habit make it a choice shade tree for smaller properties

Native to Eastern and Midwestern United States
